

PRIYANK SOLANKI

sendtopriyank0302@gmail.com | +919328005522 | [LinkedIn](#)

Education

Government Engineering College, Dahod

2019 - 2023

- Computer Engineer | CGPA: 7.57

P.P SAVANI CHAITANYA VIDHYA SANKUL, Surat

- GSEB BOARD (Class XII), percentage: 65

Shree K.P Sanghvi Vidhya Sankul, Vesu, Surat

- GSEB BOARD (Class X), percentage: 70

Skills

- **Programming Languages:** Java | Python | HTML | CSS | JavaScript
- **Frameworks:** Bootstrap | SK-learn | Keras | PyCharm | TensorFlow
- **Database:** MySQL
- **Technologies:** WebScraping | Machine Learning | OpenCV | Deep laerning | NLP | GAN
- **Others:** Problem-solving | Good at Communication

Related Experience

Data Science Internship at Pepcoding Pvt. Ltd. | Remote | [Certificate](#)

January'2022 - May'2022

- Successfully completed 5 months of Internship in Data Structures and Algorithms And Data Science from January'2022 to May'2022.
- In this internship, I learned Data structure and algorithms, Machine learning algorithms, and the Basics of Deep learning.

SDE Intern at Shaligram Infotech | Ahmedabad | [Certificate](#)

June'2022 - July'2022

- As SDE Intern I work on a front-end development project on HTML, CSS, Bootstrap, Javascript, and jquery.

Projects

Automation by Selenium | Python, BeautifulSoup, Selenium | Python

- Login Automation project
- Built an automation program to login into a website.
- Used Selenium to implement automation in the browser.

Project on ML for creating ml model for given data from scratch | ML, Python | [Github](#)

- Perform Data Engineering on a given dataset for cleaning a dataset.
- Create an ML model for a given dataset to predict insights.

Project on GAN for Generating Anime using given Dataset | GAN, DL, Python | [Github](#)

- Perform a GAN structure to create new anime through a machine using the python library.

Academic and Extracurricular Achievements

1. 4th Rank in ML hackathon: [Certificate](#)

I work on an unclean noisy dataset. First, cleaning the data and applying various Machine learning algorithms, then getting the different accuracy scores and the final prediction based on the maximum accuracy model.

2. Solved 300+ DSA problems across platforms such as Leetcode, Nados, and GeeksforGeeks.
